

Motor Insurance Fraud Essentials (MIFE™)

Professional Programme

Strengthening Fraud Awareness Across Insurance Operations

**Certificate &
Digital Badge
Awarded**

Professional Programme Outline

Motor Insurance Fraud Essentials (MIFE™) is a structured professional programme designed to provide practical understanding of fraud risks across the motor insurance lifecycle. The programme examines how fraud occurs, the most common fraud schemes affecting insurance operations, and the practical approaches used to identify, prevent, and respond to suspicious activity within underwriting and claims environments.

The programme adopts a practical and operational approach, enabling participants to strengthen fraud awareness, improve detection capability, and support more effective fraud control within insurance operations.

Programme Overview

Motor insurance fraud continues to present significant financial, operational, and reputational challenges across insurance markets. Fraudulent activities such as staged accidents, exaggerated claims, identity manipulation, documentation fraud, and organised fraud schemes contribute to increased claims costs, reduced profitability, and higher premiums for genuine policyholders.

Motor Insurance Fraud Essentials (MIFE™) provides a structured examination of fraud risks across the motor insurance value chain, from underwriting through to claims settlement and fraud response. The programme equips participants with practical knowledge required to identify fraud indicators, recognise suspicious patterns, apply fraud detection techniques, and respond appropriately within professional and organisational procedures.

The programme is designed for practical application and focuses on real-world insurance operations rather than theoretical concepts alone.

Why This Programme Matters

- ✓ Fraud awareness
- ✓ Claims protection
- ✓ Operational integrity
- ✓ Risk management

Learning Outcomes

Upon successful completion of this programme, participants will be able to:

- Understand the concept and impact of motor insurance fraud
 - Differentiate between opportunistic and deliberate fraud
 - Identify fraud risk across the motor insurance lifecycle
 - Recognise common motor insurance fraud schemes and patterns
 - Detect fraud indicators at underwriting and claims stages
 - Apply practical fraud detection and red-flag analysis techniques
 - Recognise behavioural, documentation, timing, and pattern-based indicators
 - Apply structured procedures when responding to suspected fraud
 - Support stronger fraud prevention and control within insurance operations
-

Target Audience

This programme is designed for:

- Claims Officers and Claims Handlers
- Underwriters and Underwriting Assistants
- Insurance Investigators
- Fraud Prevention and Risk Personnel
- Insurance Agents and Brokers
- Customer Service Personnel
- Motor Assessors and Claims Support Staff
- Insurance Operations Personnel
- Entry-Level and Mid-Level Insurance Professionals
- Professionals seeking practical awareness of motor insurance fraud risks
